NOTE FOR Chief, DDI Information Requirements Staff

Herb,

1. Attached is a draft of a memorandum I am proposing to distribute to begin organizing as soon as possible the COMIREX effort that will be required under the recent USIB action on modification of T-KH controls--assuming, of course, the necessary Presidential approval is obtained. Before formally issuing it, I would appreciate any comments you might have.

2. I envisage the Steering Group as being comprised of yourself--representing CIA--along with [REDACTED] for DIA and NPIC respectively and Jack Kulpa for the NRO. I would also ask [REDACTED] to serve with us as security advisor. I feel a small group of this caliber is essential to effectively oversee the broad-ranging and complex responsibilities involved in this task. I visualize the Steering Group needing to meet only occasionally for an hour or two to review and oversee any general or policy questions which may come up. The principal formal actions, etc., would be handled through COMIREX and the Special Working Group.
